

Fayette County Groundwater Conservation District

Protecting our most precious resource - **WATER**

NAVIGATING THE FAYETTE COUNTY GCD WEBSITE

Did you know that you can go to our website at www.fayettecountygroundwater.com and see if your water well is registered and/or see any information the District has on your well? Well you can!!!

Our website has a lot of helpful information on it. For instance, when our next Board of Director's meeting will be. You can find all of our Agendas and Minutes from the meetings. Looking for a Well Driller? Just click on the Helpful Information tab and you can find a list of all well drillers that currently drill in Fayette County.

The best part about our website is you can click on the Registered Wells tab, click the link and it will open up a map of Fayette County. You can type in your address and it will zoom right to it. If your well is registered and we have a latitude and longitude it will show up on your property. You can click on the star, and it will give you all the information we have on your well.

Thinking about drilling a new well? Did you know you have to file an Application for Registration before the well can be drilled? Now you can do that online on the website!!! Curious about the depths of wells in your area? You can use the map on the website to see the depths, water levels (if available) and water quality (if available) of other wells. Just click on the star that is on the property near you, and all the information will be there.

Don't see a star on your property but you have a water well? Give us a call and we can get it registered (which is required by law). Think you have a registered water well but still don't see a star? Give us a call, we may have the registration but don't have the coordinates to place the well. (We'd really appreciate that!)

We encourage you to browse through the website. All of our Forms are available for download on our website. The water testing form is available on there also! You can read about our Director's and our Staff, you can find Kid's pages, check the rainfall totals, see what's happening at the District and best of all, you can chat with us! Our website is live, so while you are browsing, if you have any questions just click on the chat button and we'll say hello!

We are here to serve you, the landowners of Fayette County.

DISTRICT OFFICE

Fayette County Groundwater
Conservation District
255 Svoboda Lane, Rm 115
La Grange, Texas 78945
Telephone: (979) 968-3135

Leo Wick, Sr.	President
Terry Hays	Vice-Pres.
Cynthia Rodibaugh	Secretary
Alan Brothers	Director
Harvey Hayek	Director

David A. Van Dresar,
General Manager

Wendi Pyle Labus,
Assistant General Manager

OUR MISSION:

To provide for the conservation, preservation, protection, recharge, and prevention of waste of groundwater and of groundwater reservoirs for the People of Fayette County.

Fayette County Groundwater News is a yearly publication of the Fayette County Groundwater Conservation District. Subscriptions are free upon request.

The District offers free brochures and information sheets concerning many aspects of water conservation and protection. Just drop by the office during regular office hours.

Protect Your Water-Register Your Well!

The Fayette County Groundwater Conservation District is conducting a **well inventory** throughout Fayette County. You can help by registering your water well. This will assist the District in estimating how much water the people of Fayette County need now and for projected growth. Forms can be found on the District's website or by contacting us at (979) 968-3135.
